For Con:

1. Bring some comics
2. Make blow up photocopies of comics.
3. Little animal figures: all types, small (<1")
4. Space ship minis:

Factions:

(TLF)
Tashtan Liberation Front: college students & rabble who are against the station.
Pretty fringe & a nuisance engaging in acts of vandalism. Tashtan is rather capitalist and in debt to off world businesses. The TLF wants a socialist economy (somewhat more radical than the ConFed core planets) and an end to capitalist trade off-world.

~~Tashtan Space Cadets: a JROTC like organization for the Tashtan Homeguard.~~
A handful of these students were to fly up on the resupply shuttle that was delayed by the TLF attack.

(FSA)
FSA Aerospace: an outsystem business that is providing contractors/teams for Tashtan station. Tashtan owes FSA a large sum of money for building the station. While FSA is a supporter of the station, they may have become concerned with its progress. The clandestine coalition would ~~not~~ certainly buy their debts. GyFF is not FSA.
